

## RBA Policy

Alpha Networks promises to actively promote the Responsible Business Alliance (RBA) Code of Conduct to ensure the safety of the whole supply chain and the working environment of subcontractors, expecting all workers to be respected, a business environment with dignity can be created and moral standards will be obeyed.

Besides the continuous self-expectation on the improvement of labor conditions, healthy and safety conditions, environment conditions and moral standards, we promise to accept the on-site examination of a third party verification institution and actively demand that suppliers adopt RBA equipment and standards.

To present such a promise and create a business environment for sustainable development, we uphold an honest and intransigent attitude and standpoint when enacting RBA related policies.

We are determined to fight for the rights and privileges for electronic appliance suppliers.

## RBA Code of Conduct contains the following regulations
